Actividad 2

The image displays two sequential screenshots of a Google Doodle titled "Celebrating 50 years of kids coding". The interface is set within a web browser with multiple tabs open, including "PORTAL ESTUDIANTES", "Curso: Campus Central", "PENSAMIENTO COMPUTA", and "Celebrating 50 years". The URL in the address bar is doodles.google/doodle/celebrating-50-years-of-kids-coding/?doodle=32615474&platform=2&domain_name=google.com&hl=es. The background is a light blue sky with floating geometric shapes and a small robot on a pink block.

First Screenshot: A purple instruction box appears with the text "Thanks, I love carrots! Let's try a turn. Add a [blue turn block] and then a [green arrow block]". Below the text is a code editor area with a play button. At the bottom, there are icons for a blue turn block and a green arrow block.

Second Screenshot: The instruction box updates to "Let's try Loops! Loops run the same code multiple times. Place the [orange loop block] around the [green arrow block]". The code editor area now shows a sequence of blocks: a blue turn block, an orange loop block containing a green arrow block, and another green arrow block. The bottom icons now include an orange loop block and a green arrow block.
